TS6282

DVB-T Receiver with USB port

The Digital Terrestrial Receiver TS6282 enables viewers to watch subscription-free standard definition (SD) contents transmitted with digital terrestial broadcasting.
Connecting an external memory through the USB port on the front panel of the TS6282 the viewer can record and play his favourites programs and films with the REC&PLAY function.
The slim design of the receiver and the possiblity to place it in vertical position, make it unique in his kind. The TS6282 comes with a wide range of features such as: the LCN function, to order TV and radio channels in automatic and logical manner; the PROTECTION SYSTEM function, which prevents the modification of the decoder settings due to involuntary actions and the TIMER which enables the viewer to program the time when the receiver turns on and off and also when it should register.
The TS6282 is compatible with all Italian and European frequencies and it is automatically updated via OTA (Over the air).
